

Leibovitz's L-15 Medium

Without L-Glutamine

Product Code: AL011

Product Description:

Leibovitz's Medium was specifically designed to grow cells in a CO₂ free atmosphere. The standard sodium bicarbonate/CO₂ buffering system is replaced by combination of free basic amino acids, phosphate buffers and higher levels of galactose and sodium pyruvate. As a result, the medium does not require supplementation with sodium bicarbonate and can be used under conditions of free gaseous exchange with the atmosphere. The medium can be used to grow human tumor cells and embryonic cells and also established cell lines like HeLa and Hep-2. The medium is frequently used in diagnostic virology where tissue cell lines or strains need to be grown in closed systems. Leibovitz's medium obviates the need of frequent medium change.

AL011 is Leibovitz's L-15 Medium without L-Glutamine. Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific for different cell lines.
