

# **Technical Datasheet**

# Hanks' Balanced Salt Solution 1X

With Sodium bicarbonate
Without Calcium, Magnesium and Phenol red

**Product Code: TL1098** 

## **Product Description:**

All media used in tissue culture have a basis of a synthetic mixture of inorganic salts known as a physiological or balanced salt solution (BSS). All the physiological salt solutions have been derived from the salt solution originally described by Sydney Ringer (1885). The first balanced salt solution to be developed specifically for supporting the metabolism of mammalian cells was Tyrode's solution. Since then many modifications have been done to obtain better buffering salt solutions and to prevent calcium precipitation.

The function of a salt solution is:

- To maintain the medium within physiological pH range.
- To maintain intracellular and extra cellular osmotic balance.
- Modified with a carbohydrate, such as glucose serves as an energy source for cell metabolism.

Hanks' balanced salt solution is designed to equilibrate with air, hence does not require CO<sub>2</sub> air mixture. TL1098 is Hanks' balanced salt solution with sodium bicarbonate and is designed for use with cells maintained in less CO<sub>2</sub> environment or CO<sub>2</sub> free environment. It does not contain calcium, magnesium and phenol red.

## **Composition:**

Ingredients	mg/L
INORGANIC SALTS D-Glucose	1000.000
Disodium hydrogen phosphate	48.000
Potassium chloride	400.000
Potassium dihydrogen phosphate anhydrous	60.000
Sodium bicarbonate	350.000
Sodium chloride	8000 000

## **Quality Control:**

# **Appearance**

Colourless, clear solution

#### pН

7.10 - 7.70

## Osmolality in mOsm/Kg H2O

260.00 - 300.00

#### Sterility

No bacterial or fungal growth is observed after 14 days of incubation, as per USP specification.

## **Toxicity test**

Passes

## **Endotoxin Content**

NMT 1 EU/ml

## **Storage and Shelf Life:**

Store at 15-30°C way from bright light. Shelf life is 24 months. Use before expiry date given on the product label.
